# A BEGINNER'S GUIDE TO HEALTH SCREENINGS

## THYROID FUNCTION TEST

To diagnose and monitor treatment of common thyroid gland disorders.

## HEPATITIS B & C SCREENING

To check whether you have a viral hepatitis infection or had one in the past.

## BLOOD GROUPING

To determine your blood group.

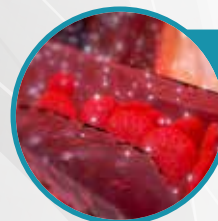

## DIABETIC SCREENING

To identify asymptomatic individuals who are likely to have diabetes.

## CANCER MARKER

To find chemicals made by cancer cells.

## HIGH SENSITIVE C- REACTIVE PROTEIN

To measure level of inflammation and risk of cardiovascular disease.

## LIPID PROFILE

To monitor and screen for risk of cardiovascular disease.

## BONE

To determine how well your body's metabolic processes are affecting your skeleton.

## URINE ANALYSIS

To detect renal, urinary, hepatic and metabolic disorders.

## LIVER FUNCTION TEST

To help diagnose and monitor liver disease or damage.

## FULL BLOOD

To check the type and number of cells in your blood, including red blood cells, white blood cells and platelets.

## RENAL PROFILE

To measure how well your kidneys are working.

All the above screenings tests can be done at Laurent Bleu Medical Clinic
